Subject: Cerami & Browning Construction, Inc.

To Whom it May Concern,

It is my pleasure to offer this letter of recommendation for **Cerami & Browning Construction**. Our firm has worked with Joe Cerami and his Company on many projects for more than twenty years. Projects have included low bid public works projects, selected bid list projects, and projects on which Cerami & Browning was selected by the owners and the work was negotiated. In every bid scenario, Cerami & Browning's commitment to quality and client satisfaction was unsurpassed. This commitment to hold their work to the same high levels of quality on publicly ('low bidder') bid projects is very rare, and I feel speaks to the level of commitment Joe Cerami has to his craft and to the clients that entrust him to look after their interests.

Cerami & Browning is a well organized, efficient, and impeccably honest company. While every one-of-a-kind design will run into some challenges during construction, Cerami & Browning has handled every situation with the best interest of the project and owner in mind. Joe Cerami looks to create solutions, not problems, on the construction site. Each project has been completed on time and on or below budget. The most recent major public works project we completed together was the very successful Teen and Community Center for the City of Anderson. The City commented regularly on how much they appreciated the dedication to the project from every Cerami & Browning employee, and the great attitude each one had every day. The City Manager and staff were especially pleased with the attention Joe Cerami personally gave to the project.

In closing we would highly recommend Cerami & Browning to anyone who is considering a construction project in the north state.

Sincerely,

Les Melburg
